SU320KTX-1.7RT

High Sensitivity InGaAs SWIR Camera

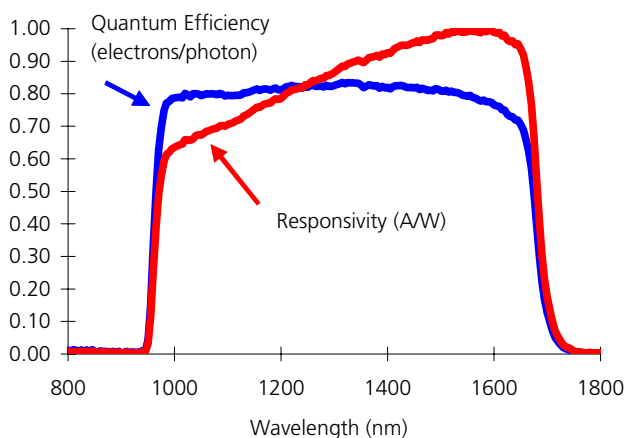

The compact **SU320KTX-1.7RT** is an InGaAs video camera featuring high-sensitivity and wide dynamic range. It provides real-time night-glow to daylight imaging in the Short Wave Infrared (SWIR) wavelength spectrum for passive surveillance and use with lasers. The camera delivers clear video at every lighting level from partial starlight to direct sunlight due to **on-board** Automatic Gain Control (AGC), image enhancement and built-in non-uniformity corrections (NUCs). Simultaneous Camera Link® digital output provides high quality 12-bit images for image processing or transmission. Low-power and light-weight with compact size enables easy integration into surveillance systems, whether hand-held, mobile or aerial.
